Who we Are

We are Tech People. Primordial Technology Services is a family run business that now has a solid foundation in the Garden Route. We provide services to companies nationwide. Our client service is of utmost importance to us as we believe that technology should be making an efficient, quantitative and positive impact on your business.

Why We Do It

We assist companies with Tech Services so that Tech can work for you! In our line of business many companies are either not aware of certain technologies, the technology is not working correctly or they are not using it correctly. This can make drastic differences in your business and often can increase profits and efficiency.

How We Do It

We provide an umbrella of Tech Services in an efficient and customer oriented manner. With our strict SLA's, we look to provide you with as low as possible downtime. We strive and operate in relation to a quote by John D. Rockefeller, "Success is doing common things uncommonly well".

What We Do

I.T Management

I.T Management is a core function of our business. We provide you with I.T support with strict SLA's to ensure minimal downtime. We provide routine and preventative maintenance on all your I.T equipment, ensuring peace of mind that your staff are well equipped. In addition, we provide 3rd party management. If you have any existing service or equipment with someone else, we can communicate with them. Leaving you with one call to make for any I.T issue.

Online Marketing

Marketing is one of the biggest requirements to having a successful business. In today's age, online marketing has taken over. We setup, manage and maintain social media accounts like Facebook and Instagram. We also create marketing campaigns on social media as well as google ads to your selected target audience.

Website Development

As another core functions, we offer fully customized, clean, professional and responsive website development. Logo creation and content creation is also offered to all our clients.

Security Systems

Security Systems relies on Technology to function. At Primordial Technology services we offer access control and CCTV installations

ALWAYS WITH PASSION
